A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

1. SIGNIFICANT ACCOUNTING POLICIES**1.1 System of Accounting**

The financial statements have been prepared on a going concern and on accrual basis, under the historical cost convention and in accordance with the generally accepted accounting principles, the accounting standards prescribed in the Companies (Accounting Standards) Rules, 2014 issued by the Central Government and relevant provisions of the Companies Act 2013, to the extent applicable.

1.2 Use of Estimates

The preparation of the financial statements in conformity with the generally accepted accounting principles requires the management to make estimates and assumption that affect the reported amount of assets, liabilities, revenues & expenses and disclosure of contingent assets & liabilities. The estimates & assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the Financial Statements. Actual results may defer from the estimates & assumptions used in preparing the accompanying Financial Statements. Any differences of actual results to such estimates are recognized in the period in which the results are known / materialized.

1.3 Revenue recognitions

Interest and other income are accounted on accrual basis

1.4 Stock in trade

Stock is valued at lower of cost and net realizable value

1.5 Investments

Investments are classified as long-term and current. Long-term investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Costs of investments include acquisition charges such as brokerage, fees and duties.

1.6 Taxation

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law), deferred tax charge or credit (reflecting the tax effect of timing differences between accounting income and taxable income for the period) and fringe benefit tax.

Deferred taxation

The deferred tax charge or credit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the asset can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realization of the assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realized.

1.7 Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired based on internal/external factors. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generated unit to which the asset belongs, is less than its carrying amount, the carrying amount is reduced to its recoverable amount.

1.8 Provisions, Contingent Liabilities & Contingent Assets

Contingent liabilities, if material, are disclosed by way of notes, contingent assets are not recognized or disclosed in the financial statements. A provision is recognized when an enterprise has a present obligation as a result of past event(s) and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation(s), in respect of which a reliable estimate can be made for the amount of obligation.
