

“I AVOID DABBA TRADING IN COMMODITY FUTURES”

Dabba (off-exchange) trading is both risky and illegal.

- ➔ Dabba trading or trading in commodity futures outside the FMC-regulated exchanges is illegal as per the Forward Contracts Regulation Act (FCRA), 1952.
- ➔ Dabba trading is also risky as it does not provide protection against counterparty default risk as guaranteed by commodity futures exchanges for trades done on them.

I insist on and verify records of all my commodity futures trades.

- ➔ I insist on keeping all the records (contract notes etc.) related to my trades.
- ➔ I also verify the authenticity of these records with the detailed information available on the exchange website upto 5 working days from the day of trade.

A dispute in Dabba trading cannot be redressed by the commodity exchange.

- ➔ Dispute arising in Dabba trading can only be referred to police.
- ➔ However, disputes arising in trades done on commodity futures exchanges can be redressed, including through arbitration, as provided by the exchange bylaws and regulations.

**Trade Safe; Trade Peacefully.

FOUR RIL DISCOVERIES FAIL TO GET NOD

By REPORTERS
New Delhi, 2 December

Despite a meeting of more than three hours today, the management committee overseeing Reliance Industries Ltd's KG-D6 gas block in the Krishna-Godavari basin did not approve commercialisation of four more of its discoveries in the same area.

A source said the meeting ended without any decision on the issue. The approval of what is termed 'commerciality' would have paved the way for investment of around \$1.5 billion in developing the four discoveries.

The management committee has representation from the government, its director general of hydrocarbons and the company. RIL is also mulling the risk of being partially disallowed cost recovery on the already producing D1, D2 and MA fields. Eight months into the financial year, the management committee approves the expenditure and monitors oil blocks) has not cleared the expenditure for the company's biggest gas producing field. Normally, the approval comes in the first quarter of the financial year, claimed a source. The approval for annual expenditure is among many other pending.

The person, who did not want to be named, said some of the plans that have

WHAT'S THE FUSS ABOUT?

After exploration, the discovery is approved as commercially viable. Subsequently, development and production plan, exploration and development costs can be recovered after production starts. Production costs are deducted from profits. The remaining profits are shared by contractors and the government.

Total cost recorded by RIL-Nike consortium on KG-D6 field till Mar 2011 (in \$ mn)

EXPLORATION
1,079

Besides the currently producing D1, D2 and MA, there are more than a dozen discoveries in the KG-D6/MA/2 block that is known as KG-D6.

been sent for approval may now need a fresh look after BP formally came on board as holder of a 30 per cent participating interest in RIL blocks. "The consortium may need to file addendums to the plans already submitted to the MOC, in case the new partner feels the need for it," he added.

RIL had earlier this week stopped an arbitration notice on the government, pre-empting it from disallowing a portion of the costs since the gas field is producing less than the volumes projected earlier. Cost recovery allows a company to deduct costs from production before sharing revenue from it with

the government. The higher the cost recovery, lower the profit share.

The company said resolution of the cost recovery issue was important, as it is not to hinder future investment in the block. In the arbitration notice, Reliance stated the move to limit the amount of expenditure the company could recover from the KG-D6 fields was illegal and outside the Production Sharing Contract.

Besides the annual budget for the D6 field during 2011-12, approvals are required for development plans of B-series and satellite discoveries. RIL plans to invest up to \$2.35 billion to produce about 15 million standard cubic metres a day of gas from the B-Series gas field in the same block.

The Dharubas-34 discovery, known as the R-Series field, has gross in-place gas reserves of 1.64 trillion cubic ft, which, according to Reliance, can be brought into production in four to five years. The MOC approval is required for declaring the discovery as commercially viable. Further development of the discovery can only happen after this approval. Besides, field development plans for four satellite fields that will involve investment of \$1.5 billion for producing up to 10 mmscfd of gas from the Dharubas-2, 6, 19 and 27 (D-2, D-6, D-19 and D-27) fields in the KG-D6 block by 2016 is also awaiting approval.

Coal India's profit earning strategy turns aggressive

By DEEPA PAUL SINGH
New Delhi, 2 December

Coal India's new strategy to save margins in a production-constrained market by capitalising on the quantum jump in spot prices of the dry fuel, has turned more aggressive.

The contribution of spot sales, or e-auction, to the major miner's total revenue saw a rise of 17 per cent in the first half of this financial year, compared to less than 10 per cent in the same period last year.

This was even as the share of e-auction in the overall volume of coal sold remained stagnant at 10 per cent. While the world's largest coal producer adopted the strategy in 2010-11, the first half of this financial year was marked by a decline in production for the first time in the company's history and an increase in the notified price in February. Both factors, experts say, should have made e-auction less attractive. However, that did not happen.

In the first half of 2011-12, revenue from e-auction rose 68 per cent to Rs 134 crore, from Rs 80 crore. This was a result of the skyrocketing average sale price of e-auction, which doubled from Rs 800 a tonne to Rs 1,600, thanks to historic coal shortages, forcing

COAL INDIA FY 2011-12 FACTFILE

	April-Sept 2011-12	April-Sept 2010-11
E-auction Volume (MT)	20.2	22.7
% of total volume sold	10	12
Average coal price at e-auction (Rs/tonne)	1,608	2,003
Notified price (Rs/tonne)	920	1,800
E-auction revenue (Rs crore)	3,564	8,134
% of total revenue	9.8	17.5

Source: Coal India

to be sold through e-auction. Total sales stood at Rs 27,495 crore, of which Rs 3,564 crore was contributed by e-auction. Coal through e-auction was sold at a 73 per cent premium to the notified price of Rs 920 a tonne.

Between April and September this year, the company sold 176 mt coal, an 11.5 per cent decline compared with the same period last year. Of this, 22 mt was sold through e-auction. Total sales stood at Rs 3,564 crore, of which Rs 3,564 crore came from e-auction. E-auction coal was sold at a notified price of Rs 920 a tonne, compared to less than 10 per cent in the same period last year.

Notably, the notified price itself was increased in February to Rs 1,600 per tonne from Rs 920 last year.

Experts believe with coal shortage unlikely to subside soon, the boost to Coal India's profitability as a result of increased realisation from e-auction sales is here to stay. While there has been substantial power capacity addition, coal production has risen only marginally, leading to a shortfall

in linkage realisation, they say.

The greater reliance of coal consumers on e-auction may have led to higher prices. Even on e-auction, some coal available has not been picked by the consumers for reasons such as availability of transport facilities and to some extent, concerns about quality. So, the quantum of coal available through e-auction has also been limited, which may reflect higher prices," says Dipesh Datta, director, consulting for mining at Deloitte Touche Tohmatsu India Pvt Ltd.

He says heavy reliance on e-auction sales for profitability may not be a concern, as "the coal market is likely to remain a volatile market for some time". Globally, coal miners have moved from annual price contracts to quarterly ones and many have balanced their portfolios with a higher proportion of spot sales.

On the Bombay Stock Exchange, Coal India shares closed 1.1 per cent higher at Rs 334.

Kolkata bus service set to go green

By PRABAL SARKAR & SHAM JACOB
Kolkata, 2 December

THE West Bengal government, in partnership with Essar Oil and Indian Oil, may soon run India's first buses on coal-bed methane, a natural gas extracted from coal beds and, like other gases, considered a better alternative to petrol or diesel.

"We were approached by the West Bengal Pollution Control Board to discuss a proposal to convert coal-bed methane gas from the Raniganj block to run State Transport Corporation buses in Kolkata," said a spokesperson from Essar Oil. "We are in talks with Indian Oil to get in place a tripartite agreement that will enable access to their piping facility at the Raniganj district."

to convert coal-bed methane (CBM) into compressed natural gas (CNG), which can be used to run buses."

Burning gas produces far fewer emissions than coal oil and is increasingly embraced by policymakers as a 'cleaner' fuel for transportation and other uses, according to a Reuters market analysis. It is seen as a 'bridging' technology until solar, wind and other advanced technologies come into use.

DELHI, MUMBAI Delhi and Mumbai already use CNG to run buses used for public transport.

While there is a shortfall in supply of CNG in West Bengal, it has a rich deposit of CBM in the oldfield of the Raniganj district. Raniganj is in Burdwan district. The proposed fuel for Kolkata buses may be costlier than CNG, though the price can come down at a later stage with large-scale production. Essar Oil's technical feasibility study envisages transportation of the requisite quantity of gas to Kolkata through truck-mounted cascades.

File photo of State Transport Corporation buses plying on Kolkata roads. (S. Mohan)

According to government estimates, India has an estimated CBM resource base of 1.5 to 2 trillion cubic metres and has about 26 blocks covering 11,000 sq km. Apart from Essar, other companies in the sector are Oil India, Oil and Natural Gas Corp and Mukesh Ambani-led Reliance Industries Ltd.

An official in the state transport department confirmed the proposal. "About 3,000 buses run by the different transport corporations in the city will be brought under the project. If we can successfully use CBM as an alternative fuel option, pollution would certainly come down in the city and its suburbs," the official said. The conversion of CBM into CNG is a difficult process, though.

"Initially, it will be launched as a pilot project supplying the gas to less than 50 buses," the official added.

Infosys visa fraud case trial: Hearing on August 20

By REPORTERS
Bangalore, 2 December

A US trial court has set August 20 next year as the trial date for the alleged visa fraud case against Infosys.

The case, being heard by a federal court in Alabama, relates to a lawsuit filed by whistleblower Jay Palmer in February 2010.

The petitioner had alleged Infosys was routinely bringing Indian IT professionals to the US on B-1 visitor's visas to work full-time at clients' sites.

Alabama federal judge Myron H Thompson, while reviewing the ruling yesterday, said a pre-trial conference would be held on July 20, 2012. "This case is set for trial during the term of the court commencing on the 20th day of August 2012," the judge said.

Coincidentally, the trial date starts fall on the birthday of Infosys co-founder N R Narayana Murthy, now chairman-emeritus of the 1981-founded company.

SAMVIT 2011 IIM LUCKNOW'S ANNUAL LEADERSHIP SUMMIT

"The Sinking World Economy & its implications for Indian Businesses."

In order to build a conduit from the knowledge centers of the corporate world to the classrooms of IIM Lucknow, Samvit was conceptualized as a leader's panel discussion on new ideas and revolutionary solutions. Today, the world is witnessing the structuring of a new economic order. The mighty, humbled by the tragedy of their fate, are increasingly looking to India to take on the reins of leadership. The question remains, how? Samvit 2011 is an IIM Lucknow initiative to address this burning issue. Samvit, on the 3rd of December, shall see some of India's most brilliant minds discuss and ideate on "The Sinking World Economy and its implications for Indian Businesses".

China reveals Indian Ocean plans

To Assist Seychelles Escort Missions Amid Reports Of An Overseas Army Base

By [Name] in Beijing

Beijing: China on Monday said the Indian Ocean island of Seychelles has invited its navy "to regularly and temporarily" send ships during escort missions there, even as media reports from Beijing suggested that China was re-establishing its first overseas military base.

While the Chinese ministry of national defence insisted that its activities in the region were restricted to "seeking supplies or participating in appropriate harbours in the Seychelles", the ministry also said that the country's navy would be conducting escort missions during the mission.

Second, it is a degree of assistance to the Seychelles. The ministry added that the "Chinese navy will maintain self-navigation in the Indian Ocean, as well as the support to the Seychelles".

The Seychelles, which has a 150,000 population, has a strategic position between Asia and Africa, and has been a hotbed of Indian Ocean piracy.

Officials said the invitation was part of a "comprehensive" security cooperation between the two countries, including the exchange of information and the exchange of personnel.

The Seychelles, which hosts a US drone base, has a strategic position between Asia and Africa, and has a substantial Indian Ocean population.

long-distance missions," the ministry said in a statement.

Seychelles said the Chinese navy would be conducting escort missions during the mission.

China has also given the Seychelles navy two light aircraft.

China had earlier signed a contract with the UN-backed International South Atlantic Oceanographic and Marine Survey (ISAOMS) to conduct a joint survey in the Indian Ocean over the next 15 years.

The contract gives China exclusive rights to explore a 3,000 sq km area in the Indian Ocean, which is located in the southern Indian Ocean.

China was reported to be studying the possibility because of its economic interests in the region and its strategic position in the Indian Ocean.

The two countries signed a military cooperation agreement in 2004 that enabled some 100 Seychelles soldiers to be trained in China.

Pak may close airspace to US

By [Name] in Islamabad

Islamabad: Admitting a "credibility gap" between Islamabad and Washington, prime minister Yusuf Raza Gilani has urged closing Pakistan's airspace to US and said the blockade of the US supply lines into Afghanistan would be in place for weeks. The ban on US supply lines, already in its third week, would be lifted until "new rules of engagement" were agreed.

Zardari didn't suffer stroke, says Gilani

By [Name] in Islamabad

Islamabad: Pakistan president Asif Ali Zardari will likely need two weeks to recover from the stroke he suffered before he returns to his post, prime minister Yusuf Raza Gilani said on Monday. Zardari has been in a coma since he suffered a stroke on Sunday. He said Zardari needed medical attention because he was "rehabilitating".

Qaida men break out of Yemen prison

By [Name] in Sana'a

Sana'a (Yemen): Several al-Qaida militants escaped early on Monday from a prison in the southern Yemeni port city of Aden, officials said, controlling their way out in the second such escape in the past few months.

A prison official said at least 10 militants escaped through an up to 40 metres long tunnel, which took the inmates from under the prison to a nearby area.

AMID VIOLENCE, SYRIA GOES TO POLLS

A woman votes in a polling station in Damascus, Syria, on Monday. The state media has reported that voting started in the capital and other cities, but it is unclear how safe the process is in the midst of the conflict.

Noriega jailed upon return to Panama

By [Name] in Panama

Panama: Claymores Noriega was in a Panamanian jail on Monday after returning from his exile in Costa Rica. He was arrested on charges of drug trafficking and money laundering.

On Facebook, Russians take on tech-savvy Medvedev

By [Name] in Moscow

Moscow: Russian president Dmitry Medvedev's attempt to placate the masses who rallied against a disputed poll backfired on his own Facebook page Monday when it became flooded with ironic comments.

Tycoon to challenge Putin in 2012 polls

By [Name] in Moscow

Russian tycoon and US-based oil magnate Mikhail Khordov said Monday he would challenge President Vladimir Putin in the 2012 presidential election, "having made the most serious decision of my life."

Tehran in 'final stage' of unlocking US drone code

Tehran: Iran will reverse-engineer the US drone in its possession, and in the "final stage" of unlocking the aircraft's software, the head of Iran's Revolutionary Guards said on Monday. "Our mission will be to reverse-engineer the aircraft," Farzad Sharif said, according to the website of Iranian state television.

In the near future, we will be able to mass produce it. Iranian engineers will soon build an aircraft superior to the American (drone) being reverse-engineered," he was quoted as saying. Iran says it captured the sophisticated US drone, a high-speed, high-altitude, unmanned aircraft, in a conflict zone in the Gulf of Oman.

Noriega will be serving three years in prison for the abduction and murder of the children of a Panamanian politician. He was arrested on charges of drug trafficking and money laundering.

Saudi beheads woman for 'sorcery'

By [Name] in Riyadh

Riyadh: A Saudi woman was beheaded on Monday after being convicted of practicing sorcery, which is banned in the ultra-conservative kingdom, the local state media said. The woman, who was 40 years old, was accused of practicing sorcery and was sentenced to death by a court in the eastern province of Jeddah.

US mulls tax break for 'space burials'

By [Name] in Washington

Washington: Americans who want to save money on space may want to consider making their ashes into space, according to legislation being proposed in Congress. The bill, which is part of a larger bill, would allow space residents a tax deduction of up to \$2,000 for the cost of sending their remains into space.
