- **What is Data Leakage?**

A data breach or data leak is the release of sensitive, confidential or protected data to an untrusted environment. Data breaches can occur as a result of a hacker attack, an inside job by individuals currently or previously employed by an organization, or unintentional loss or exposure of data.

- **Our Policy to prevent data leakage.**

In our company, we adopt 8 preventive steps/ measures to protect/ safeguard/ mitigate our data from leakage, misuse of information which are as follows:

- a) Secured Endpoints.
- b) Monitor all network access/ 24*7 Surveillance
- c) Encrypted Data.
- d) Evaluated third party risk.
- e) Identification/ Safeguard of sensitive data.
- f) Implementation of data loss prevention software.
- g) Access control to prevent unauthorized breach in data room.

- **Retention, Processing and storage of Information**

At our company, we shall retain Information within organization only as long as it is necessary to meet legal or regulatory requirements or for legitimate business purposes only.

We had implemented required security practices and standards in line with the global standards and have a comprehensive documented information security

program and policy in place, which contains managerial, technical, operational and physical security control measures that commensurate with the information assets being protected with our organization's nature of business. It is being reviewed periodically to keep pace with business, technology and regulatory changes.

- **Culmination**

In adoption of our effective data leakage prevention policy and corrective measure to mitigate the risk accounting from data leakage with efficient data surveillance team, we acknowledge that the data, information pertaining personal information kept safe, encrypted, protected with us and will be accustomed only for legitimate business purposes.
